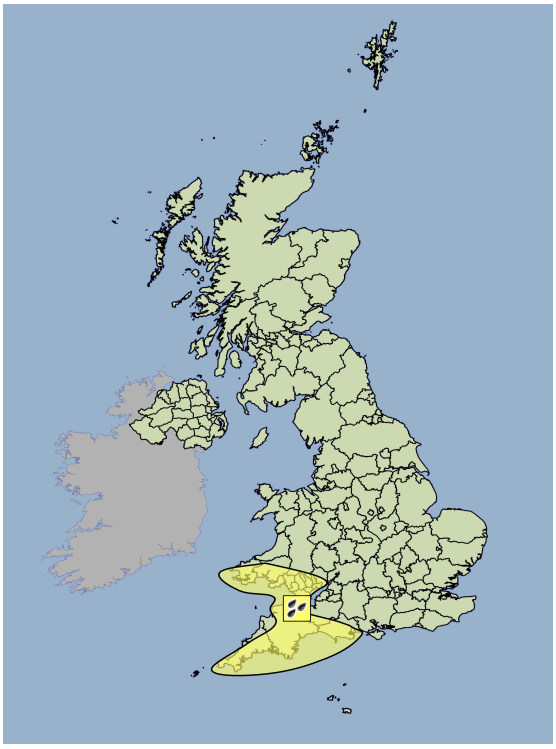
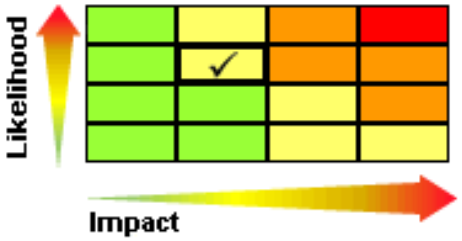
National Severe Weather Warning Service





Chief Forecasters Assessment
An active frontal system associated with an Atlantic depression, will push in from the west later on Monday, and is then expected to become slow- moving as waves run northwards along it. The strong southerly winds, will enhance rainfall over south-facing slopes and hills, where totals of more than 50 mm in 24 hours are expected locally; 20 to 30 mm will fall more widely.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **00:10 on Tue, 11th Nov 2014** until **23:59 on Tue, 11th Nov 2014**

Rain and strong winds will affect southwestern parts of Britain from later on Monday, with the rain becoming particularly heavy at times on Tuesday.

The public should be aware of the risk of localised flooding, perhaps exacerbated by fallen leaves blocking drainage courses.
